DISSERTATION PROJECT OVERVIEW

EXIGENCY + RATIONALE

METHODS

RESULTS + IMPLICATIONS

RESEARCH AGENDA + TRAJECTORY

QUESTIONS

A CHANGING POPULATION PYRAMID...

Older adults are expected to outnumber children by 2035. This year, over one billion senior citizens are alive on the planet.

BUT AN UNCHANGED RESEARCH LANDSCAPE?

Technical and professional communication (TPC) research overwhelmingly focuses on school and work, though (despite a 2004 call to attend to aging!)

Literature on Older Adults + Technology

TECH COMM

Manifestos + Calls for Action

Lippincott, 2004
Chisnell, Redish, &
Lee, 2006
O'Hara, 2004

HCI & UX

Experience Reports +
Best Practices

Kang & Yoon, 2008
(mp3 players)
Brajnik & Giachin,
2014 (thermostats)
Johnson & Finn, 2017;
Wilkinson & Gandhi,
2015

COMP + LITERACY

Advocacy To Value
Older Adult
Computing as
Literate Act

Bowen, 2011 & 2012
McKee & Blair, 2016
Rumsey, 2009

What's missing?

Users are
depersonalized: the
human element of HCI
is forgotten

No deep dives looking
at individual users or
communities of users

No work on retirement
communities as
subjects or sources of
data

Attn: Communications Director

Dear Sirs:

I am seeing RED. After 3 days of trying to change my e-mail with your organization with no success I am appealing to Corporate to solve my problem.

I recently moved to a senior independent living apartment from my home. I no longer am able to use my former e-mail (djw1492@comcast.net) as they do not service this place for free. My new e-mail is djw1492@aol.com. I have a very "DUMB" phone that does not accept text messages as I have had problems with bad calls so as a result your security won't allow me to make the necessary change in my e-mail. At 83 years old, I am quite able to talk with a representative which now is impossible. Of all the doctors, lawyers, companies, hospitals, and etc. you are the only company that is so unreachable by "DUMB" phone. Please help me to resolve this problem as soon as possible as I would like to participate in your services before I die. Computers are fine but sometimes a person that "talks" is important. Sincerely,

Joris L. Woodward (Highsuprano10)

490 Killingsworth Way, #340

The Villages, FL 32162-2173

DUMB PHONE #352-638-3646 No service on text)

Home phone 352-674-3882

Just fix it and let me know, PS I am on FACEBOOK if security really wants photo ID

A PERSONAL EXIGENCY

Spring Break visits with
Grandma and the "red
letter"

Research Site

THE VILLAGES, A CENTRAL
FLORIDA RETIREMENT
COMMUNITY

The United States' fastest growing city

Population has doubled since 2010
(51,000 to 114,000 residents)

Median community age of 67.4 (research
sample median age was 82.2)

Research Questions

1
→

What does "everyday" computer and internet use look like for older adults living in a residential senior community?

2
→

What are the goals and purposes for technology usage articulated by older adults in this community? What motivations shape these?

3
→

What factors (material, infrastructural, embodied, cognitive, cultural, design, etc.) help or hinder older adults from realizing their technological goals?

4
→

What recommendations can be generated for a more inclusive experience architecture, given this age cohort's experiences and reflections on technology:?

Methods

1: SEMI-STRUCTURED INTERVIEWS

Answering questions about computing skills, learning, problems

15 participants, 7–30 minutes

2: NATURALISTIC (UNSTRUCTURED) OBSERVATIONS

Walking through "everyday" computer use while "thinking aloud"

7 participants, 10–40 minutes

3. STRUCTURED TASK ANALYSES

Completing a series of tasks to identify pain points

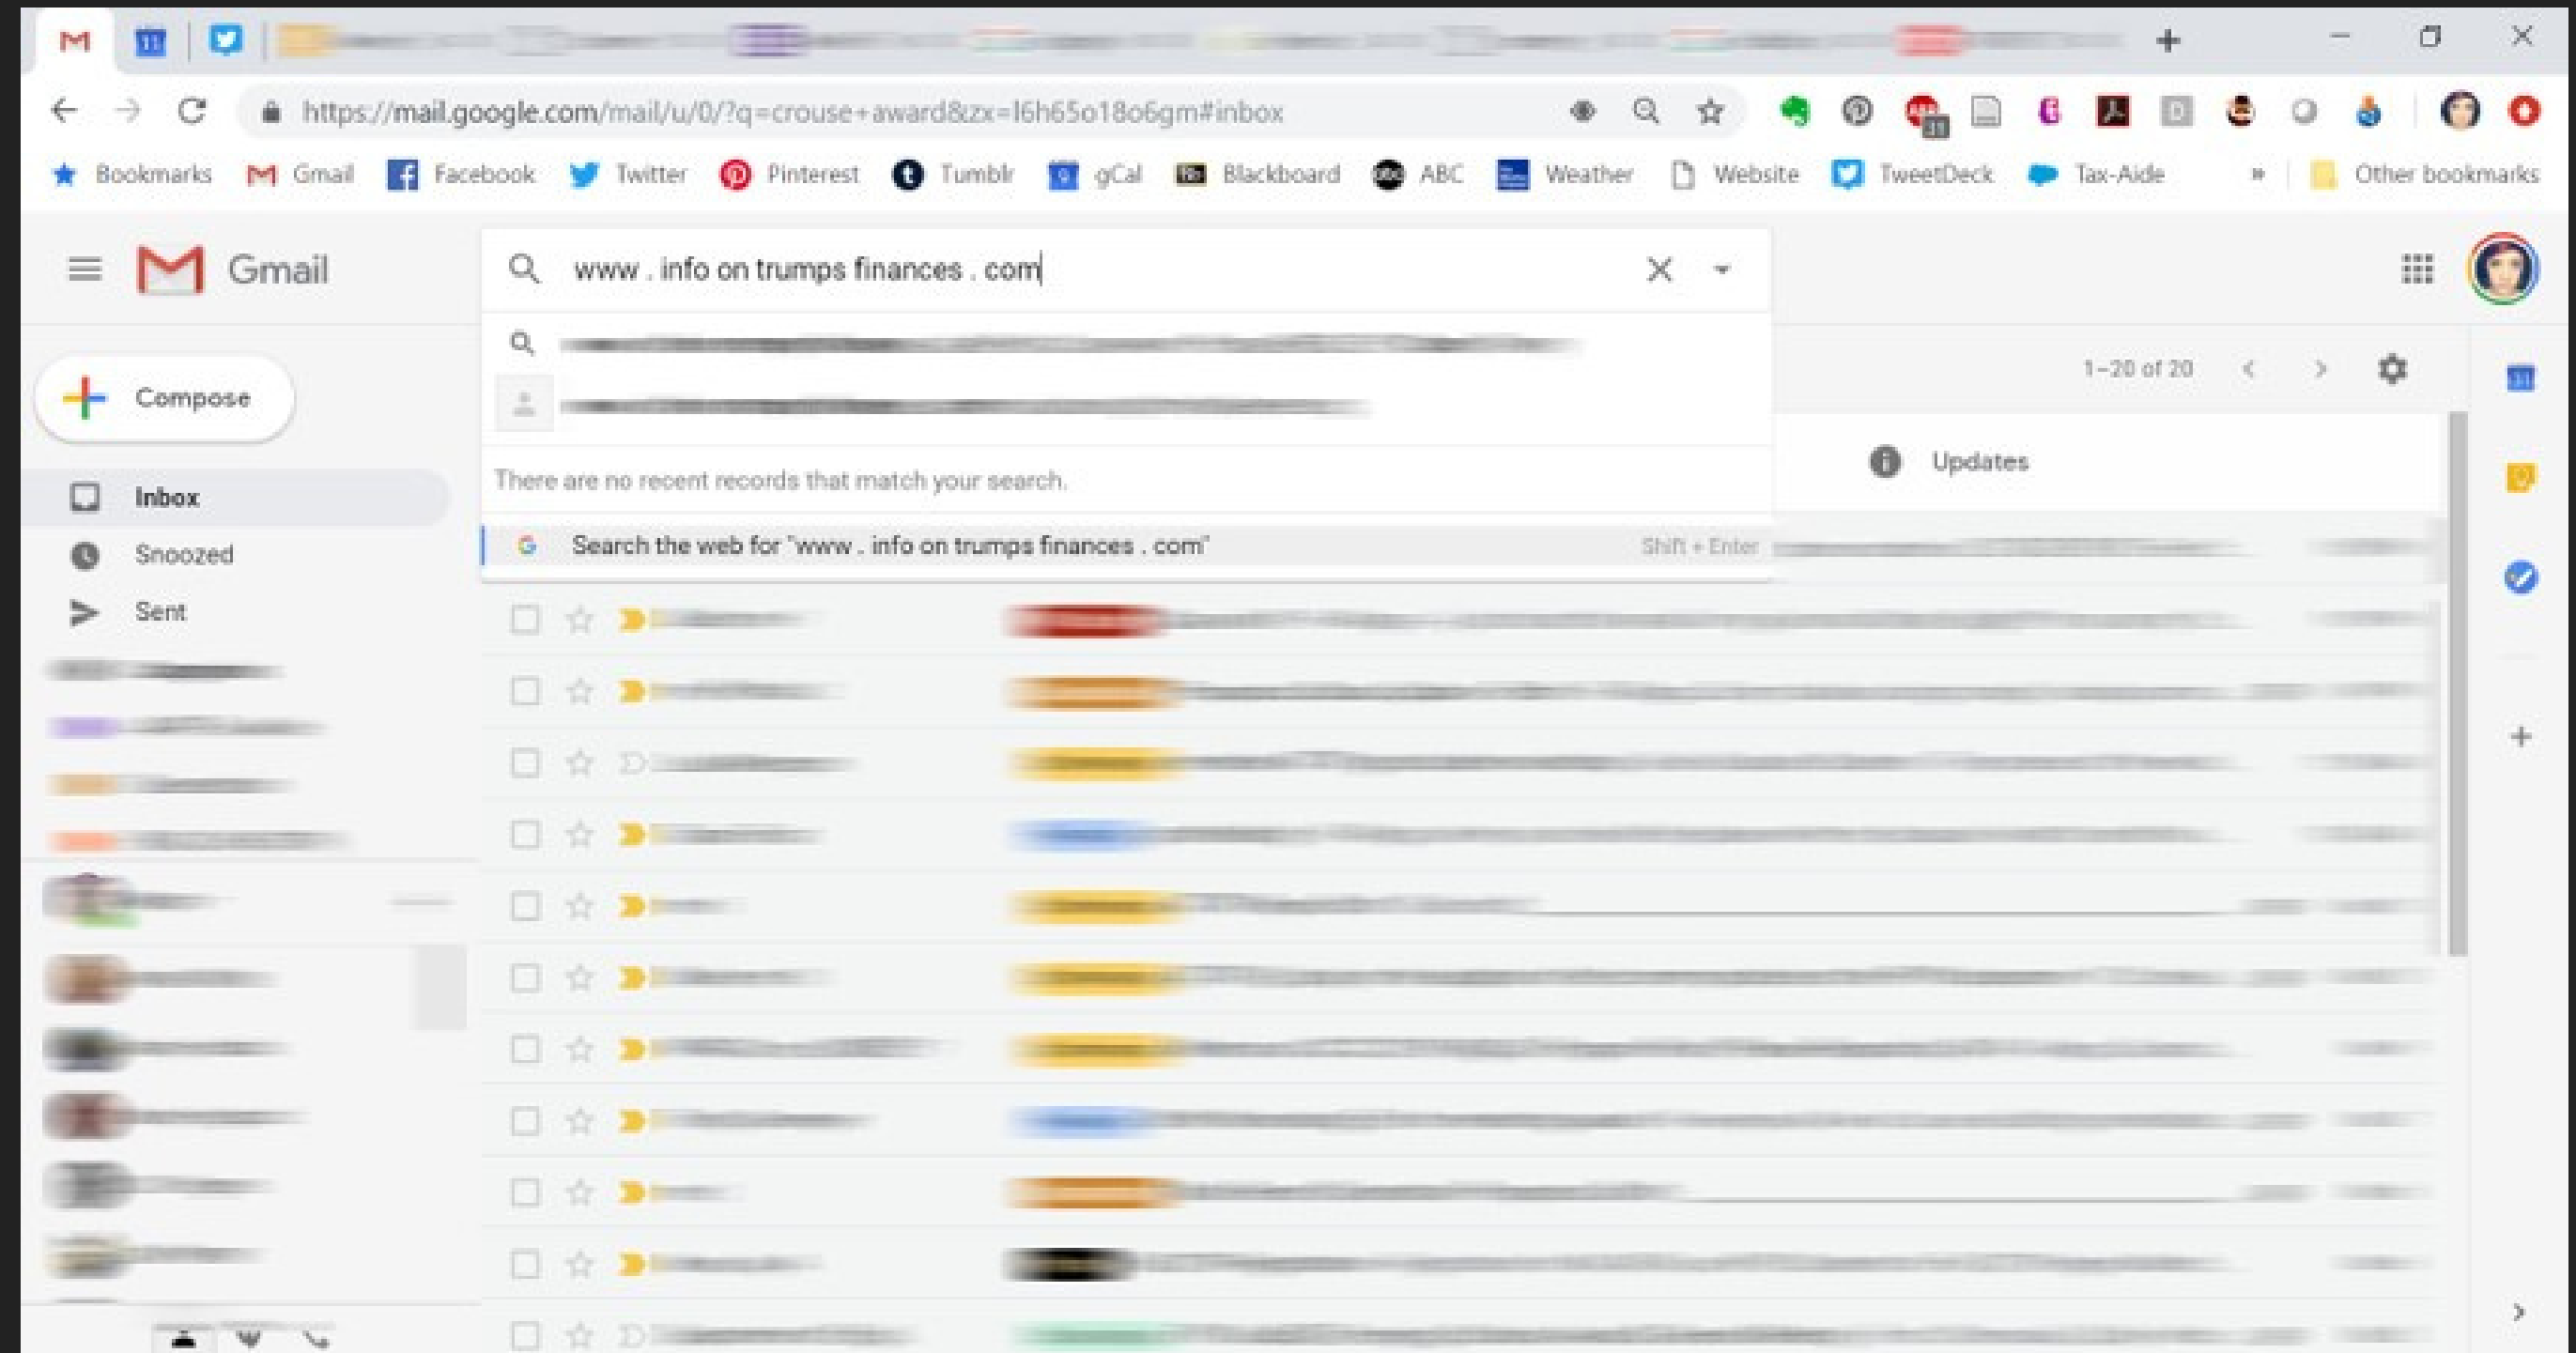

6 participants, 15–45 minutes

ILLUSTRATING RESULTS

Through participant Holly's structured task user experience

IMPLICATIONS

SO WHAT CAN WE DO ABOUT THIS?

1. Revalue older adults' technology engagement as literate activity
2. Intervene through design, documentation, and instruction
3. Give back to older adults in our regions and communities
4. Incorporate age and aging into the technology design process, considering users different from ourselves

Carliner's (2000) Info Design Dimensions

PHYSICAL

Helping users FIND
information

COGNITIVE

Helping users
UNDERSTAND information

AFFECTIVE

Motivating users to
PERFORM

CONSIDERATIONS SHAPING OLDER ADULTS' UX

1. Embodied / Material
2. Cognitive / Psychological
3. Educational
4. Generational / Cultural

Embodied & Material Dimensions

OPTICAL-VISUAL

Presbyopia, cataracts (make reading small text difficult)

AUDITORY

Reduced hearing capacity

MOTOR SKILLS & CONTROL

Touch screen interfaces often preferred; trackpads or mice difficult to use

MOBILITY

DEXTERITY & FLEXIBILITY

ADDRESSING THESE
DIMENSIONS IN DESIGN
INCREASES THE PRODUCTIVITY
& SATISFACTION OF ALL USERS
(UNIVERSAL DESIGN)

Cognitive & Psychological Dimensions

COGNITION

Memory, attention, decision-making
decrease as age increases

MENTAL FLEXIBILITY

SORTING & FILTERING

Ability to disregard perceptual information
that's unrelated to the user's goal

ADDRESSING THESE
DIMENSIONS IN DESIGN
INCREASES THE PRODUCTIVITY
& SATISFACTION OF ALL USERS
(UNIVERSAL DESIGN)

I took a night course [in computers] at the high school with a friend of mine, and we were the oldest ones in the class. When they asked our age, we laughed... and that was a very basic course.

MINNIE, 86 YEARS OLD

I didn't work for 25 years [after having children]. The school system asked me to come back, and they had computers. And without the secretary at another elementary school, who helped me out considerably, I wouldn't have had a clue... because it just never entered my lifestyle! Typewriting and all, but not a computer.

HOLLY, 80 YEARS OLD

Cultural / Generational Dimensions

CURRICULUM OF AGING

The set of assumptions about what it means to be old or growing old in a society: in the US now, linked to bodily disrepair, supposed incompetence or inability to learn new technology, etc.
